

www.kingheatingproducts.com

Control Features:

Manual Reset High Limit (CSD-1)

Outdoor reset & Cascade up to 16 units

Freeze protection and Time and Date input

Two temp output: one for DHW and one for CH

Integrated Modbus RTU for connection to BMS gateways

Integrated 0-10v connection, error history with time & date

Domestic hot water priority via tank sensor or aquastat

Manual Reset LWCO (CSD-1)

External Alarm connection

3 circulator outputs

Ultimate 299, 399 and 499

High efficient Condensing Boiler

Submittal Sheet

Job Name:	Date:
Location:	
Engineer:	
Contractor:	
Model Number:	Gas Tyne:

Product Features:

- Certified to ANSI Z21.13/CSA 4.9-2017 gas-fired boiler standard
- SA240-S43932 Stainless Steel Heat Exchanger
- ASME "H" stamped boiler designed and constructed in compliance with the ASME Boiler and Pressure vessel code Section IV
- CSD-1 compliant, low NOx operation and direct spark ignition
- Fully modulating burner, 6 to 1 turndown ratio
- Vents via 3 in 1 included adapter: CPVC, PVC, PP or Stainless Steel
- Convertible from NG to LP (field replaceable orifice required)
- Direct vent sealed combustion or indoor intake air compatible
- Max operation pressure and temp: 80psi and 185°F
- Maximum vent lengths: 228' per side on a CHB 299, 605' on a CHB 499
- Cascade venting approved in Canada

Included Items: 10k Outdoor sensor, 45psi ASME relief valve

Optional Features: Wifi control with mobile app and extra accessory, Racking systems for 1,2, 3 or 4 boilers with or without low loss header

Minimum and maximum allowable combined vent and air inlet length:

- Minimum venting length: two feet (2 ft) for all boilers
- Maximum venting length: see table below.

Venting Lengths:

Maximum Exhaust Length / Maximum Combustion Air Intake Length										
	CHB-299	CHB-399	CHB-499							
4"	228' / 228'	121' / 121'	92' / 92'							
5"			359' / 359'							
6"			605' / 605'							

Cascade Vent

The 299 & 399 have an internal flue gas valve for an overpressure system according to the table below.

This device is needed to prevent recirculation of the flue gases. The 499 has no internal flue gas valve and needs to be calculated for a nil pressure common flue system or a separated flue system.

If separated flue systems cannot be applied, ask a flue gas supplier to calculate a nil pressure common flue system.

10.1.1 CALCULATION CHB (VALID FOR PARTS SUPPLIED BY DURAVENT (M&G)).

Maximum vertical length in feet (m).										
Type of boiler	Number of appliances	DN150	DN150/200	DN200	DN200/300
