

**Boiler Room  
On A Skid!**

# *Custom Steam Systems*

## Fully Modular, Skid Mounted Units

- Both single and multi-boiler options
- Compact and easily transportable
- Designed for quick installation and reduced project costs
- For all types of steam boiler applications - 15 to 300 PSI
- Modular designs increase turndown and system efficiency
- Custom designed and engineered to your unique specifications
- Single source responsibility
- 20 Year boiler warranty

## Package Systems Available in 1, 2 or 3 Boiler Configurations

Completely integrated pre-engineered modular boiler skids from Sellers take the guess work out of auxiliary equipment selection and installation.

### Realize time and cost savings during installation of the system.

The system can be built from our standard range of boilers or custom built to your unique specifications. Fully automatic control can be included as well as monitoring devices, feedwater conditioning and all the necessary fittings, pipe work and electrical wiring.

### Skid Mounted Systems Contain:

- Boiler or boilers (all Sellers models are available for skid mounting)
- Boiler feed system or deaerator (optional) with pumps
- Chemical feed system (optional)
- Blowdown separator
- Water softener (optional)
- Master control panel with touchscreen and BMS communication (optional)

Commercial & Industrial markets have relied on Sellers Steam Boiler solutions for decades.
