ENERGY RECOVERY VENTILATORS FOR COMMERCIAL APPLICATIONS

# **PRODUCT SPECIFICATIONS**

### CASING

Steel casing is covered with high quality multilayer aluminium and zinc alloy to prevent corrosion. The casing is equipped with a switch to turn the ventilator off when the service panel is opened. Service access from both left and right side. For outdoor installation the roof is necessary (optional).

#### **ENERGY RECOVERY CORE**

Unique enthalpy heat exchanger provides high-efficient heat & humidity recovery. No drain pan required.

#### **FANS**

The unit is equipped with supply and exhaust centrifugal fans featuring backward-curved blades and advanced EC (Electronically Commutated) motor technology. These fans deliver superior energy efficiency and precise speed control. They come with built-in thermal overheating protection and an automatic restart function, ensuring consistent and reliable performance. Additionally, both the electric motors and impellers are dynamically balanced to minimise noise and vibration, providing smooth and efficient.

#### **DEFROST SYSTEM**

Fan stop defrost system is activated when the outdoor temperature falls below 23° F (-5° C).

#### **FILTER**

Washable MERV 6 air filters in exhaust and supply air streams. Filters MERV 8, MERV 13 optional.

## CONTROL

The unit incorporates an integrated automation and control system with following functions:

- · Operation mode switch.
- · Airflow balancing by supply and exhaust fan independent speed adjustment.
- Automatic recovery core frost protection.
- External control device connection.
