

DESCRIPTION

VENTS AntiRADON fans are specially designed with high pressure capabilities for Radon Mitigation.

Compatible with Ø 4", 5", 6", 8", 10" and 12^{3/8"} round air ducts.

The fans may be mounted to the walls with mounting brackets included with every fan.

Power Cord & Mounting Brackets are included for Easy Installation.

CASING

Factory Sealed case, No Leakages, UV Resistant durable ABS plastic (UL94 certified plastic).

MOTOR

High-Efficiency external rotor motor with a Dynamic Balanced Impeller for Long Lasting & Vibration Free operation.

Ball Bearings motor ensures Low-Noise and Maintenance-Free operation.

High efficiency backward inclined impeller delivers exceptional airflow and high static pressure.
