FEATURING U.S. PUMP CORP

The Future in Water Management

This month, we're proud to spotlight U.S. Pump Corp, delivering engineered water booster, sump, and sewage systems from design to fabrication.

With UL 508A listed controls and NSF 61/372 certified systems, their solutions are built for performance, efficiency, and reliability across commercial and municipal projects.

Proudly fabricated in the USA.

*- Jensen Sales &
Marketing Team*

Built for Performance

- ✓ Variable speed booster systems
- ✓ Stainless steel construction
- ✓ Advanced touch-screen controls
- ✓ Commercial & municipal applications

In this newsletter:

- IBE Variable Speed Booster Systems
- IBV Vertical Multi-Stage Booster Systems
- BMS & SCADA Integration Options
- Applications for Commercial & Municipal Projects

Fully Customizable Systems

U.S. PUMP SYSTEMS ARE ENGINEERED TO FIT YOUR PROJECT

- Duplex, triplex, quadplex & multiplex configurations
- Custom pressure set points
- BMS & SCADA integration options
- Built to meet the specific flow and head requirements

Controls & Integration

- BMS & SCADA ready
- Digital pressure monitoring
- Touch-screen controls

BUILT FOR EFFICIENCY AND LONG-TERM PERFORMANCE.

iBE Booster Systems

THE iBE SERIES FEATURES END-SUCTION, VARIABLE-SPEED BOOSTER SYSTEMS DESIGNED FOR COMMERCIAL AND MUNICIPAL CONSTANT-PRESSURE APPLICATIONS.

- Up to 3000 GPM
- 304 stainless steel construction
- UL 508A listed controls
- NSF 61/372 certified
- Fabricated in the USA

iBEV Vertical Multi-Stage Systems

THE iBV SERIES DELIVERS HIGH-HEAD PERFORMANCE IN A COMPACT, VERTICAL MULTI-STAGE DESIGN IDEAL FOR DEMANDING APPLICATIONS.

- Up to 1200 TDH
- 304 stainless steel construction
- Variable-speed controls
- Multi-pump configurations available
- Built for long-term efficiency and reliability
